

Brian Ascanio Bio

Brian heads up the A/V team and is responsible for coordinating the Audio/Video aspects of both the Traditional, Contemporary, and all other events at the church. The A/V team coordinates all church live streams/recordings and edit any recorded videos or audio as needed. The team creates some of the on-screen digital/graphical assets needed for online services or events and also provides additional A/V support for the smaller classrooms by helping people get connected to the displays and projectors.

When Brian is not helping at the church, he is helping his beautiful wife, Aimee, raise Aurora and Elias, along with their dog Phoebe. Brian also works full time as an A/V technician at an architecture firm in Dallas. In his free time, Brian plays drums in one of his two bands or plays disc golf, depending on the weather.

Brian's favorite dessert is cheesecake though he always keeps a stash of sour gummy worms or sour patch kids somewhere close by!

His favorite song from the Praise band is Beautiful Things. Brian says, "It's such a deep and powerful song on its own, but the band's performance of this song is hands down the best. The whole band is superb but I especially like the different layers of harmonizing when the vocalists are performing the song."
